Self-Repairing*

# Dry Spell<sup>TM</sup> PLUS

## UNIQUE ROOTING SYSTEM!

**DRYSPELL PLUS<sup>TM</sup>** tall fescue/ryegrass mixture combines THREE heat and drought resistant tall fescues with a top-rated quick establishing turf perennial ryegrass to combat disease, drought, heat stress and damaging pests in three ways: First, fast establishing ryegrasses with roots close to the surface, **provides quick cover.**

Second, deep-rooting tall fescue plants sends roots straight down - **up to 6 feet below ground!** These deep roots have the ability to access water and nutrients deep in the soil all year long.

Third, **DRYSPELL PLUS<sup>TM</sup>** has a special component, a variety called **Titan Ltd.**, which is able to produce underground shoots and roots called "rhizomes." These rhizomes spread out to bare spots creating new plants and aiding the turf stand with quicker repair. So, even when **DRYSPELL PLUS<sup>TM</sup>** gets knocked around, **the rhizomes constantly act as self-repairing tools, ready and willing to create new plants when needed.**

## QUALITY THAT WILL LAST

**DRYSPELL PLUS<sup>TM</sup>** is mainly composed of THREE top-performing tall fescue varieties. These provide great looking turf with richer color, and better disease resistance due to the diversity of the genetics. This means your lawn will have a better chance against brown patch, summer stress, and other ruthless diseases. **DRYSPELL PLUS<sup>TM</sup>** is also endophyte enhanced to provide a natural barrier to invading pests.

## QUICK ESTABLISHING

By including a top-rated long-living perennial ryegrass, **DRYSPELL PLUS<sup>TM</sup>** establishes quickly, preventing erosion and soil runoff while helping create a lush dense lawn.

- \* **FAST Establishing**
- \* **DROUGHT Resistant**
- \* **HEAT Resistant**
- \* **NATURAL Pest Resistance**
- \* **EXCELLENT For Sun and Shade**
- \* **SURVIVES on Less Water**
- \* **SURVIVES on Less Fertilizer**
- \* **ATTRACTIVE Rich-Green Color**

**Dryspell Plus<sup>TM</sup> should be seeded at 8-10 lbs/1000 square feet**

*Beat The Heat!*
